Discussion:

We need to split up the research for everything required for this project and we need to discuss among each other what is an appropriate way to split it up and come to a consensus of what research is needed outside of what research is already required.

Conclusions:

While brief, responsibilities were given to each member of the group. Dawid researches Ethereum, Murtajiz researches Bitcoin, and Neil and Anosh need to research what is needed to create a cryptocurrency. An unofficial meeting will be held on Friday, November 11th, to determine as a group what path we should follow with this project after looking at all the research.
